AMENDMENT

Sir:

In response to the Final Office Action mailed October 27, 2003, and the Advisory Action mailed April 22, 2004, please amend the above-identified application as follows:

A discussion of the **Amendments to the Drawings** begin on page 2 of this paper.

A complete **Listing of the Claims** in this application begins on page 3 of this paper.

**Remarks** begin on page 7 of this paper.

**Amendments to the Drawings**

Attached is one (1) replacement sheet and one (1) annotated sheet.

The drawings stand objected-to (Final Office Action, Section 1) under 37 C.F.R. §1.83(a) because the “emitter of the first bipolar transistor being directly connected to the isolation region, as recited in claims 12 and 17, must be shown in Fig. 7.” The Advisory Action elaborates upon these objections (page 2, second paragraph). In response to the Office Action and Advisory Action, Applicants have amended Fig. 7 as shown on the attached annotated sheet to produce Fig. 7 as shown on the attached replacement sheet. Specifically, Applicants have amended Fig. 7 to show a direct connection between the emitter of first bipolar transistor Q33 and isolation region ISO. Support for this amendment is found in Fig. 5.

In view of the foregoing, the Examiner is respectfully requested to approve this amendment and to withdraw the objections to Fig. 7.
